Braman Pest Services,

Earlier this year, Rol-Vac decided that it was necessary to earn an A.I.B. (American Institute of Bakers) Certification for Food Contact Products. This required having a pest management policy along with a full time pest control company working with us.

After meeting with employees of your company and seeing your overall plan for our building, we decided that Braman was the best way to go forward for pest control at Rol-Vac. Because of the experience of your staff and how they've worked with us and taught us over the last few months, we passed in our first ever A.I.B. audit recently. Thank you very much for all your help in achieving this goal.

Sincerely,

Matthew Jones
General Manager, Rol-Vac
